

Our energies for a Better Life

Education

Bouygues Energies & Services has an established track record in the education sector both in the delivery of [facility management](#) [1] services or capital project (stand alone or BSF/PFI).

With many years experience in schools, colleges and universities we understand the **special requirements** needed to provide clean, safe, [energy efficient](#) [2] and well maintained facilities which provide value for money.

Our experience includes:

- **Schools:** Delivering FM services across a range of secondary schools in the UK, working with the students to develop **sustainable solutions** in the learning environment.
- **Academies:** Total FM services for academies. Supporting our clients in **developing techniques** for learning, making sure the building responds to these needs.
- **Universities:** FM services in universities in UK, France and the Middle East recognising the specific needs in Higher Education
- Our **Capital Projects** team has installed a number of high-tech research facilities across the UK including University of York and Kings College London.
- **Research facilities:** FM services plus design, space planning and installation in museum and research facilities, helping clients develop the **best environment** for learning.

We are actively engaged in supporting our clients and the student population beyond service delivery whether it is sponsorship of sports teams, work experience/mentoring or even becoming a School Governor – all part of being a partner.
