

Our energies for a Better Life

Property & asset management

Bouygues Energies & Services understands how important property and asset management is to our clients, and the impact that it can have on their core business.

For us, property and asset management is about delivering cost-effective solutions that meet the wider organisational objectives of our clients. Working with them, we implement tailored strategies to ensure their property portfolio is efficient, effective and sustainable and meets current and future business needs.

This means ensuring that our core [facility management](#) [1] services are fully integrated with the property and asset management solution - with a focus on the long value of property - whether lifecycle management or [energy consumption](#) [2]. This enables us to deliver enhanced asset and workplace performance.

Backed by the comprehensive skills of our service partners, we develop and deliver a range of integrated solutions that meet the individual needs of our clients, including:

- Property performance diagnostics
- Strategic property appraisals
- Strategic asset management
- Whole life costing
- Accommodation analysis
- Benchmarking
- Energy and sustainability services
- Acquisitions and disposals advice.
