

Our energies for a Better Life

Cleanrooms / Laboratories

Contamination control strategies are critical to quality, security and reproducibility in modern manufacturing processes. Whether the requirement is for high product containment, personnel protection or product contamination control, our experienced design and delivery teams work in partnership with clients to achieve world-class solutions.

Bouygues Energies & Services is a leading provider of turnkey, [design & build \[1\]](#), laboratory and cleanroom facilities – delivering both product protection and high containment solutions for the high tech research, development and manufacturing industries.

Our innovative, in-house design & build team have developed an intimate understanding of critical environments, armed with scientific, [process development \[2\]](#) and manufacturing knowledge, we are able to work with our clients to design, deliver and maintain critical environments that enhance research, support the next generation of scientific discovery and produce some of the world's most innovative products.

With experience of working with blue-chip global customers across a diverse range of **high risk, critical market sectors**, we remain at the forefront of cleanroom/laboratory technology developments, offering highly robust and energy efficient capital investment and lifecycle strategies.

With decades of experience of working closely with [accreditation and licensing authorities \[3\]](#) and our unique in-house process engineering teams, we have an enviable track record of achieving compliance first time, every time.
